

## Who Are We?

T

he Artists commissioned to create the unique blown glass creations on our site are part of a unique partnership and strive to deliver unrivaled quality in design in every piece delivered. While we may have "standard" designs, each is still unique and has no twin. Created by hand of only the finest raw materials, each piece is guaranteed one of a kind... the nuances which make each unique, often are the result of varying temperature; material inconsistencies; slight differences in pigment combinations... or simply, imperfections created by chance. We feel that the imperfections in each piece is what makes each piece perfect!

Each of our pieces is designed to create an individual statement through color and design, our talented glass artists are pioneering a line of brilliantly colored and individually decorated Memorial Keepsakes aimed at the growing Cremation industry and its growing popularity for environmentally minded boomers looking to have a smaller carbon footprint, even after leaving this earth. We hope that by including some of the character of the person who will reside in our cremation urns to be displayed in the materials, colors and designs, we may offer those left behind a source of comfort that goes beyond the cold brass can most often associated with this category...when you lose a loved one, you want a memorial that is representative of who they were or the things they loved... this is what we try to offer our clients.

We have created glass urns for both individuals and Funeral Service Providers that have ranged from the conservative to the amazing. We hope that you find that designing an urn for a loved one or even for yourself can be a cathartic experience, giving everyone involved a sense of satisfaction and perhaps even closure to some degree."
